

BARE SOLID SOFT-DRAWN ALUMINUM TIE WIRE

APPLICATIONS

Bare solid soft-drawn aluminum tie wire is generally used to secure a bare overhead conductor to a pin type insulator.

CONSTRUCTION

Bare annealed solid aluminum alloy 1350-O.

STANDARDS

These tie wires are manufactured and tested to meet or exceed the following standards:

- ASTM B230 – Aluminum 1350-H19 Wire for Electrical Purposes

Item Number	Size (AWG)	Diameter (in)	Weight (lb/1000 ft)
A6S-01TW	6	0.162	24.2
A4S-01TW	4	0.204	38.4
A2S-01TW	2	0.258	61.1
